

Proposals for TDA.

Proposal 1 - Rule Change

Propose to change rule regarding makeups from the current verbiage that a makeup has to occur before the next scheduled match to read

A regular season match that occurs before the next to the last regularly scheduled match must be made up within two weeks from the originally scheduled date. The rescheduled match has to be agreed on by both team captains involved and the league scorer must be notified before the original deadline for turning in the results of that regularly scheduled match.

Proposal 2 - Playoff and Banquet change - **This Season ONLY**

Propose that the first round of playoffs be held on a Wednesday night and that remaining rounds of the playoffs be scheduled on a Saturday at a central location instead of during the week and that this is the same day as the banquet. This will bring 8 teams together on that Saturday and allow for a greater turnout for the banquet.

Reason for this proposal - This allows everyone to begin his or her summer a week earlier!!! This also brings more teams together to enjoy the fellowship of darts and to participate in the banquet. In the past all teams have paid for the banquet with their dues, but not all have participated because of being eliminated earlier.

Proposal 3 - Playoff Match Points Change - **This Season ONLY**

Propose that should teams from different divisions be matched together, the lower ranking division team will receive 2 points per the difference between teams divisions. Therefore if an A division team plays a B division team, the B division team would get 2 points to start with. If A plays C the C Team will get 4 points and so on. If a B division plays a D division then the D division will get 4 point to start.

A total of 13 points are needed to declare a winner. Tiebreakers would ONLY occur when teams from the same division are playing each other.

Reason for this proposal - This will reward a lower division team if they play well above their capabilities when playing a higher division team that plays well below their ability. The advantage the higher division team has is not totally taken away in that should both teams each play at their own abilities the higher division team should prevail if they have been seeded in the division correctly at the beginning of the season.
